Click Start and let your work do. Only only command. It is important that you also make the rectangle a little larger in case a larger awakening appears. Version 1.06 added the ability to support non-English servers. Do not move the game window after you have set the positions and the rectangle. A new configuration has been added to the server configuration. A new option was added within the configuration to add a unique delay to that server of the time taken before a wakeup is performed. Requirements .NET Framework 4.6.1 VC 2015 REDIST X86 (X64 will not work) Changelog Version 1.01 Fixed a bug with "Article awake, read", correctly ". Then share. Version 1.08 Hopefully the SOOFMEMORYException has been fixed, it turns out that the error was not memory. A: Make sure the name of the game client is "neuz.exe". If not, change the process name in Configuration in Configuration.xml NEUZ Q: The server is detecting !! A: Change the name of the folder containing the bot, the EXE itself and the value of Botwindowname in Configuration in Configuration.xml GreyBIT's Flyffwkwot Q: The server I am playing. I don't have rolls. FP "->
